

HANRAJ HARI KRISHNA

Data Analyst | Power BI Developer | MIS & Financial Reporting Analyst

Hyderabad, India • +91 6301713992 • hanrajharikrishna@gmail.com
LinkedIn: [linkedin.com/in/hari-krishna-178397145](https://www.linkedin.com/in/hari-krishna-178397145) • GitHub: <https://github.com/harikrishna-analytics>

PROFESSIONAL SUMMARY

Data Analytics professional with hands-on experience in MIS reporting, financial and economic data analysis, and Power BI dashboard development. Builds end-to-end analytics solutions — from PostgreSQL/SQL data modelling to DAX-driven KPI dashboards — that turn commodity, currency, inflation, workforce, and sales data into decision-ready insights. Comfortable owning a reporting function end-to-end: database design, SQL extraction, automation, and executive-level dashboard storytelling.

CORE COMPETENCIES

Business Intelligence:	Power BI, DAX, Power Query, Dashboard Development, KPI Reporting, Data Visualization, MIS Reporting
Data & Databases:	SQL, PostgreSQL, MySQL, Database Design, Star Schema, ETL, CTEs, Window Functions, Views, Joins
Financial & Analytical:	Financial & Economic Data Analysis, Trend & Variance Analysis, YoY / MoM Analysis, Cost & Inflation Impact Analysis
Programming & Automation:	Python (Pandas, Matplotlib), Advanced Excel, Reporting Automation
Tools:	Git / GitHub, Microsoft Copilot, ChatGPT, Claude AI

PROFESSIONAL EXPERIENCE

Analyst — H&R Block (India) Pvt. Ltd.

Apr 2025 – July 2026 • Hyderabad, India

- Build and maintain Power BI dashboards for HR and operational reporting, giving leadership real-time visibility into workforce metrics.
- Design KPI reports and management dashboards that support strategic, data-driven decision-making.
- Automate recurring reporting using Advanced Excel and Power Query, reducing manual turnaround time.
- Analyse employee and payroll data to identify trends, performance metrics, and improvement opportunities across departments.

MIS Executive / Data Analyst — Lepton Software Export & Research Pvt. Ltd.

Jul 2019 – Nov 2023 • Hyderabad, India

- Owned end-to-end MIS reporting, consolidating multiple business data sources into unified Power BI dashboards for leadership and operations.
- Wrote SQL queries to extract, clean, validate, and transform data, ensuring reporting accuracy.
- Automated reporting workflows using Python, Advanced Excel, and Power Query, significantly reducing manual effort.
- Designed standardized KPI templates and reporting practices adopted consistently across teams.

PORTFOLIO PROJECTS

India Economic Intelligence Dashboard

Power BI • PostgreSQL • SQL • DAX

- Designed a PostgreSQL star-schema database consolidating gold, silver, crude oil, currency, inflation, fuel, and policy-event data.
- Built a 5-page Power BI dashboard with DAX-driven KPIs (CAGR, volatility, composite pressure indices) linking commodity and currency trends to real economic events.
- Business impact:** Surfaces inflation, fuel-price, and policy-driven risk signals to support investment and household cost-of-living analysis.

AI Workforce Analytics Dashboard

Power BI • PostgreSQL • SQL • Python

- Built an HR analytics database covering employee, payroll, performance, training, satisfaction, and AI-adoption data.
- Authored 20+ SQL queries and executive dashboards for payroll efficiency and workforce insights.
- **Business impact:** Enabled HR leaders to track promotion readiness, bonus eligibility, and AI-adoption ROI, improving workforce planning and cost optimization.

India Economic Analysis Using SQL

Power BI • PostgreSQL • SQL

- Built dashboards comparing inflation, fuel prices, GDP, and exchange rates, with DAX measures for trend and KPI monitoring.
- **Business impact:** Informed cost-of-living, currency-depreciation, and commodity-risk insights for policy and business-strategy discussions.

Super Store Sales Analysis

Python • SQL • Power BI

- Automated daily and monthly sales reporting using Python (Pandas, Matplotlib) and SQL-based data extraction, with Power BI dashboards for regional, category, and profitability analysis.
- **Business impact:** Reduced manual reporting effort by roughly 40%, improving visibility into regional and product performance.
